PREFACE

Considerable interest has been generated of late in the infrastructure available under the Indian Systems of Medicine and Homoeopathy Sector. The foundation of these systems rests to a large extent on the strength and diversity of the institutions, hospitals and practitioners involved in teaching, research and clinical care. The Department of Indian Systems of Medicine & Homoeopathy , which came into being in 1995, has initiated a number of measures to enable each system of Indian Medicine viz. Ayurveda, Siddha, Unani and also Homoeopathy to develop according to its own concepts and philosophy. Institutions imparting training in Yoga and Naturopathy have also received impetus. The objective of all these efforts has been to render simple, efficacious remedies to people, particularly in the area of preventive health, maintaining healthy life styles, alleviating discomfort caused by specific illnesses and treating chronic disorders. Naturally, there is a great interest in the institutions and health manpower through which such medical and health care services are extended.

For the purpose of successful regulation and development of the different systems for policy planning and for determining strategies which are relevant to the needs of the people, it is necessary to have accurate statistical information on the availability of medical facilities, medical man power, medical education, colleges (under graduate and post graduate), licensed pharmacies and institutions in receipt of Government grants. This XVI issue of the present publication includes detailed information on all these aspects. I hope this publication will be found useful by all those who are engaged in the development of these systems in India and abroad whether prompted by an interest in policy planning, research, provision of medical services or development of trade and commerce in medicinal products based on the indigenous Systems.

The present compilation includes information available as on 31.3.1998. Wherever available information upto 1.4.99 has been incorporated. This publication would not have been possible without the co-operation of the Directorates of Indian Systems of Medicine and Homoeopathy, Boards of ISM&H in the States/UTs, Principals of medical colleges and heads of several other institutions. I thank them all for their co-operation.

I would also like to place on record my deep appreciation for the efforts made by the officers and staff of the Planning and Evaluation Cell of the Department who worked under the overall guidance of Sh. O.S. Veerwal, Director (ISM) in bringing out this publication.

Suggestions for improvement are welcome. Errors and omissions, if any, may kindly be brought to the notice of Director/Deputy Director (Planning and Evaluation), Department of ISM&H, Ministry of Health and Family Welfare, IRCS Annexe Building, Red Cross Road, New Delhi-110001.

Shailaja Chandra

(SMT. SHAILAJA CHANDRA)
SECRETARY (ISM&H)

A. AN INTRODUCTION TO INDIAN SYSTEMS OF MEDICINE & HOMOEOPATHY

A.1: AYURVEDA SYSTEM OF MEDICINE

Human life and knowledge of preserving it as a going concern, in the face of overpowering and brute physical and biological environment, must have come into being almost simultaneously. It has to be so. There cannot be any other plausible explanation, other than this, to account for the continuity of human race and survival of its several highly developed cultures and civilisations. All known cultures of the past - Egyptian, Babylonian, Jewish, Greek, Indus -Valley etc. - had their own equally glorious and useful systems of medicine and health care.

In India, development and growth of such a body of knowledge known as Ayurveda, meaning science of life, was coeval with the growth and evoluation of Indian civilisation and culture. Vedas, which are considered to be the repositories of recorded Indian culture, have mention of this knowledge both in theoretical and practical form. There is discussion of theories about the composition of living and non-living matter, the physical, biochemical, biological, psychological and spiritual components of man and the vital motive forces working both inside and outside the body. In other ancient works there is mention of such current medical subject like anatomy, physiology, aetiology, pathology, treatment and environmental factors. This medical knowledge has been the work of ages. It is the out-come of the great power of observation, generalisation and analysis combined with patient labour of hundred of investigators spread over thousand of years. This knowledge has played so important a part in the development of Indian culture that it has been documented in an integrated form in the Vedas which are considered to have been originated from Gods. Most of this mythological and medico-religious genesis of Ayurveda is even today shrouded in the mist of antiquity.

Ayurveda means the Science of life. Around 1500 B.C. Ayurveda's fundamental and applied principles got organised and enunciated. Aatharvaveda (one of the four most ancient books of Indian knowledge, wisdom and culture) contains 114 hymns or formulations for the treatment of diseases. Ayurveda or the Indian Science of life originated and developed from these hymns. In this sense Ayurveda is considered to have divine origin representing one of the oldest organised system of medicine for positive health and cure of human sickness. Making use of systematic careful observation and documenting detailed experiences over the past several thousand of years, it has grown into a very comprehensive health care system with two major schools and eight specialisations. It has a school of physicians and a school of surgeons referred in literature as 'Atreya Sampradaya' and 'Dhanvantri Sampradaya' respectively.

The most important and massive ancient compilation of the School of Medicine is known as Charka Samhita. It contains several chapters dealing at length with

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

therapeutic or internal medicine. About 600 drugs of plant, animal and mineral origin are described in it. Besides, this compendium also deals with other branches of Ayurveda like anatomy, physiology, aetiology, prognosis, pathology, treatment and medicine etc.

An equally exhaustive ancient compilation, Sushruta Samhita exists relating to school of surgery. It deals primarily with various fundamental principles and theory of surgery. More than 100 kinds of surgical instruments including scalpels, scissors, forceps, specula etc. are described along with their use in this valuable document. Dissection and operative procedures are explained making use of vegetables and dead animals. Descriptions of how to go about doing incision, excision, extraction and bandaging etc. are detailed in this compendium. In addition, this document also mentions of such other topics as anatomy, embryology, toxicology and therapeutics. It also has a mention of about 650 drugs.

In course of time Ayurveda, which started as a magico-religious practice, matured into a fully developed medical science with eight branches which have parallels in the modern western system of medicine. The growth of these eight specialities gave Ayurveda another name of Astanga Ayurveda. In the last 50 years of development in the teaching and training, it has developed into following sixteen specialities .

1. Ayurveda Siddhanta (Fundamental Principals of Ayurveda).
2. Ayurveda Samhita.
3. Rachna Sharira (Anatomy).
4. Kriya Sharira (Physiology).
5. Dravya Guna Vigian (Materia Medica & Pharmacology).
6. Ras-shastra.
7. Bhaishajya Kalpana (Pharmaceuticals).
8. Kaumar Bharitya (Peduatrics).
9. Prasuti Tantra (Obstetrics & Gynaecology).
10. Swasth-Vritla (Social & Preventive Medicine.
11. Kayachikitsa (Internal Medicine).
12. Rog Nidan (Pathology).
13. Shalya Tantra (Surgery).
14. Shalkya Tantra (Eye & ENT).
15. Mano-Roga (Psychiatry)
16. Panchkarma.

DEFINITION.

The classical works on Ayurveda describe it as under :

It is that knowledge of life which deals elaborately and at length with conditions beneficial or otherwise to the humanity, and, to factors conducive to the happiness, or

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

responsible for misery or sorrow besides indicating measures for healthful living for full span of life .

Ayurveda is also considered as 'Science of life'. This probably makes it the earliest medical science having a positive concept of health to be achieved through a blending of physical, mental, social moral and spiritual welfare.

According to the ancient books of knowledge, health is considered as a prerequisite for achieving the supreme ends of life consisting of righteousness, wealth, artistic values and spiritual freedom. Preventive and curative aspects of diseases are considered as important components of the concept of positive health.

Ayurveda deals elaborately with measures of healthful living during the entire span of life and its various phases. Besides dealing with principles for maintenance of health, it has also developed a wide range of therapeutic measures to combat illness. These principles of positive health and therapeutic measures related to physical, mental, social and spiritual welfare of human beings. Thus Ayurveda became one of the oldest system of medicine dealing with both the preventive and curative aspects of life in a most comprehensive way.

CONCEPT OF HEALTH AND SICKNESS

The philosophy of Ayurveda is based on **Panchmahabhutas** ,of which the body is composed of **Charka Samhita and Sushruta Samhita** are the basic classics of Ayurveda written during 5th Century B.C.. Healthy person is one in whom there is equilibrium of the humours and body tissues, with normal digestive as well as excretory functions, which are responsible to gratification of physical senses and mental as well as spiritual forces. Absence of this equilibrium describes the status of disease or sickness.

The mental-spiritual forces are described as **Sattva, Rajas and Tamas.** Predominance of **Sattva** characterises a man of pure and clear thoughts and ideas. Dominance of **Rajas** imply that the person is full of activity and energy. **Tamas** is the quality indicating that the man is passive and ignorant. For a man to be healthy it is also necessary that there is functional equilibrium among these three components. Loss of this equilibrium describes a sick status.

Like mind, in case of physical body or senses also, there are three components of **Vata, Pitta and Kapha.** These are known as three humours. In a healthy person these are in functional equilibrium, and loss of it leads to sickness. These three conditions, describing presence or absence of functional equilbrium, also define the status of being healthy or sick respectively.

Health and sickness depends on the presence or absence of a balanced state of the total body matrix including the balance between its different constituents. Both

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

the intrinsic and extrinsic causes can cause disturbance in the natural equilibrium giving rise to disease. This loss of equilibrium can happen by the type of food contents, undesirable habits and non-observance of rules of healthy living. Seasonal abnormalities, exercise or improper application of sense organs, and incompatible actions of body and mind can also result in creating disturbance of the existing normal balance. The treatment consists of restoring the balance of disturbed body matrix through regulating diet, correcting life routine and administration of drugs etc.

DIAGNOSIS

Ayurveda posulates that the human organism exists in a balance of elements, imbalance causing disease. Poor nutrition, excess of body wastes, or disturbance of the circulating fluid and vital organs are the primary causes to which therapy must be applied, both in prevention and cure.

As already mentioned the diagnosis involves consideration of the whole man. For this a comprehensive knowledge about the physical, physiological and mental state of the patient is gathered and systematically recorded. This includes details about the persons temperament, his habits, diet, external living conditions and details about the disease itself. In other words, the diagnosis process largely involves two types of examination: examination of the patient and examination of the disease.

Examination of the patient generally involves one or more of the following:

1. Pulse examination to find out which of the three 'Dosha or Doshas' have lost equilibrium or balance causing the person to become sick.
2. Urine examination.
3. Examination of the stool.
4. Examination of the tongue.
5. Eye examination.
6. Examination through ausculation.
7. Examination of tactile stimulation.
8. Examination of part or parts of the body.

The above examinations help to further confirm and sharpen the diagnosis.

The second examination relating to disease concerns with determination of the causative factors, and details of the pathological as well as clinical conditions for determining treatment.

TREATMENT IN AYURVEDA

Traditional Ayurvedic Medicine is one of the important parts of the splendid cultural heritage from our ancient civilization. It is the summation of the Nation's experience in struggling against illness through centuries. It has played an important

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

role in the prosperity in our nation and is still of incalculable value. With its unique and complete theoretical system, it stands firmly among the medical sciences of the World.

Treatment of the disease generally consists in avoiding factors responsible for causing disequilibrium of the body matrix or of any of its constituents parts, through use of medicines, suitable diet, activity and regimen for restoring the balance and strengthening the body mechanism to prevent or minimise future occurrence of the disease, while treating the whole man is considered including the disease in question. Treatment in Ayurveda has to be individualised and in addition to medicine it has to consider other factors such as diet, sleep, work and rest pattern environment, age, sex, appetite strength and vitality. Treatment is directed for correcting the causative factors through prescription of medicine, suitable diet and activity regime with the ultimate goal of restoring the balance or equilibrium state of the body.

In Ayurveda there are two approaches to treatment. In one of these the recommended therapeutic measures consisting of medicine, diet and activity antagonise the disease, while in the other approach, the prescribed measures create effects similar to the etiological factors of the disease process.

EDUCATION IN AYURVEDA

The Education & Training facilities in Ayurveda are presently being monitored by the Central Council of Indian Medicine(CCIM), which is statutory body set up by an Act of Parliament known as Indian Medicine Central Council (IMCC) Act 1970. At present there are about 154 recognised Under -graduate Colleges of Ayurveda in the Country which provides Education & Training facilities. There are about 33 Post-graduate Colleges/Institutions imparting P.G. education and facilities in Ayurveda.

RESEARCH IN AYURVEDA

Systematic Research in Ayurveda under the patronage of Govt. of India started in1969 with the establishment of Central Council for Research in Indian Medicine and Homoeopathy. In the year 1978 CCRIMH was split into FOUR separate Councils one

each for Ayurveda & Siddha, Unani Medicine, Yoga & Naturopathy and Homoeopathy. The Central Council for Research in Ayurveda & Siddha (CCRAS), an Autonomous Organisation under Ministry of Health & Family Welfare,Govt. of India is engaged in developing independent and multi-dimensional Research into various fundamental and applied aspects of Ayurveda.

A.2: UNANI SYSTEM OF MEDICINE

Unani System of Medicine originated in Greece. It was further enriched and developed by Arabs and Persians. Hippocrates explained that the disease was a normal process and its symptoms were the reaction of the body to the disease. The chief function of the physician was to aid the natural forces of the body. He held that there exists in the body 4 humours that keep up the balance of it. He also laid emphasis on diet and drugs of Plant, Animal and Mineral origin for cure of the disease.

A galaxy of Unani Medical Luminaries have come to the forefront after Hippocrates, Aristotle, Herrophillus, Erasistraus, Ibn Sina,Diascoridee, Galen, Al-Mamum Ibn Masswayh, Rhazee, Ibn Ishaq, Ibn Al Baitar et. al. have contributed a lot to this system of medicine. Aristotel's study on anatomy and embryology, Galen's on the value of anatomy and experimental physiology, Ibn Masawayh's book on diettics drugs, fever, stomach disorder, catarrh, diarrhoea, colic and alchemy and Avicenne's Medical Book "Canon" are the bright examples of the development of Unani System of Medicine. The most esteemed of Rhazes medical works "Al-Hawi" was an Encyclopedia of Unani Tibb. He had written some important books like Al-Kitabul Mansuri and Treatise on small pox and measles. Apart from the eminent scholars the most renowned physician of all the time was Ibn Sina (Avi cenna) (900-1037 AD) an eminent physician, philosopher, scientist, statesman and poet who has kept this system of medicine alive for all times to come.

Three eminent bright scientists and scholars of India during this century have contributed their expertise and skills for all time to come cannot be ignored. Of them one research scholar was Hakim Ajmal Khan, who had established the famous institutes of Ayurveda and Unani in one campus in1921 in Delhi. In his span of a very short period he produced a Unani drug from Rawalfia sarpentina for the cure in hyper tension and in mental disorder after extensive research. Some active ingredients like Ajmalin and Ajmalinine are named after him. The second research scholar was Hakim Kabirudin Saheb, for whom we owe unconditional thanks for Unani system for its existence in India. Hakim Kabirudin Saheb had translated all the classical books of Unani system from Arabic to Urdu. This system is alive due to his sincere efforts and contribution. The third expert in Unani medicine was Hakim Abdul Razaque, who had established Central Council for Research in Unani Medicine, a pioneer institute in 1969 in India to undertake research in Unani Medicines.

FUNDAMENTAL PRINCIPLES

The Unani System of Medicine is based on the Humoural theory, Humoural pathology which presupposes the presence of four humours namely- Blood(Dam), Phlegm (Balgham), Yellow bile (Safra) and Black bile (Sauda) in the body. The temperament of persons is expressed accordingly by the words

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Sanguine,Phlegmatic,Choleric and Malancholic according to the preponderance of them in the body. Everybody has got a unique humoural constitution which represents the health state of humoural balance of the body. The Unani medicine plays a vital role when the individual experiences humoural imbalance. The correct diet and digestion can bring back the humoural balance. Its main emphasis is on diagnosis of a disease through Nabz(Pulse) Baul (Urine) Baraz (stool) etc. It has laid down six essentials, pre-requisite for the prevention of disease. They are known as ' Asbab-e-sitte Zarooriya' viz. air drinks, foods, bodily movement and repose, phsychic movement and repose, sleep and wakefulness, excretion and retention.

The modes of treatment are as follows:

(i) Ilaj bil-Tadbeer (Regimental Therapy)
(ii) Ilaj bil Ghiza (Dieto Therapy)
(iii) Ilaj bil Dawa (Pharmaco Therapy)
(iv) Jarhat (Surgery)

The regimental therapy includes venesection, cupping, sweating, diuresis, bath (Hammam), massage, metastasis, cauterisation, purging vomiting, exercise and leeching etc. Dieto therapy aims at treating certain ailments by administration of specific diets, whereas pharmaco therapy deals with the use of naturally occurring drugs, mostly herbals though drugs of animals and mineral origin are also used.

DIAGNOSIS AND TREATMENT

The Unani system of diagnosis of disease and treatment restoring health, revolves round the concept of temperament or 'Mizaj', The humours also have specific temperament. Changes in temperament are related to changes in the balance of humours. Any change in temperament brings about a change in the health of the individual. Thus imbalance of the harmony of humours and temperament alongwith failure of one or more parts of the body to eliminate pathegenetic waste causes disease.

The diagnosis may involve:

* By perceiving of pulse and use of thermometre.
* Examination of urine.
* Examination of stool.
* Close observation of the condition of tongue eye, lips, teeth and throat.
* Emotional and mental status of the patient is also taken note of, as indicative of certain imbalance in the functioning of human body.

The drugs also assigned a specific temperament i.e. hot, cold, moist and dry, etc. indifferent degrees. Use of drugs restores balance of humours by activising self preservation mechanism of the body. The system believes in the presence of some

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

natural self preservation mechanism in human body. The drugs are supposed to stimulate and strengthen the action of this defence mechanism. In other words, drugs not only normalise the existing imbalance but also improves the natural defence mechanism of the body so as to prevent or minimise chances of future disease. Thus the treatment generally is both curative and preventive in nature and effective. The Unani system recognises inoculation and immunization as preventive measures against diseases. Regulation of diets constitutes important part of the treatment.

ADVENT OF UNANI MEDICINE IN INDIA

The Unani System is an age old and time tested system, which was originated in Greece 5000 years back by the father of this system, the Hippocrates (460-337 B.C.). This system is a much developed and advanced system of medicine but it is widely prevalent misconception in the minds not only in the laymen but in the elite circles as well that Unani system only deals with drugs and cures the patients through the administration of drugs. Some people think that the Unani physicians are those who simply feel the pulse and prescribe some medicines and are nothing more nothing less. However, this conception is entirely wrong, has arisen due to the fact that the surgical aspect of the science of medicine are continuously neglected for a long period of its inception. On the other hand the surgical branch of this science forms an integral part. A glance at the book 'Al Tasrif' written by Spanish Hakim Abul-Qasim Zohravi (Albucassis) will convince anybody how much advanced the stage of surgery was during the days of Arabs. Unani physicians were the first to classify the disease on the basis of different anatomical and physiological systems of the body.

The next comes the pharmaceutical studies. The Unani system took the pharmaceutical section of the medicine to such a great heights that the credit of introducing a huge varieties of new things such as, Alcohol, distillation, vehicles(Araqs) and Syrups, making medicine more aromatic and palatable and refinement of pharmaceutical processes etc. goes to them.

The Government of India recognised the merit of Unani system and attempts were made to develop it as a viable system of medicine for National Health Care. The Unani drugs are cost effective, safe and widely accepted by the people of India. Therefore, the State Governments established Unani colleges , Unani dispensaries and hospitals.

The quality of the drugs is a thrust area of the system for therapeutic value. In order to improve the quality of drugs the Government of India constituted various Committees of ISM & H. Unani Pharmacopoeia Committee is the main Committee, which was reconstituted in 1998 for continuation and maintenance of uniform standards and quality in manufacturing of Unani drugs.

EDUCATION IN UNANI MEDICINE

The education and training facilities in Unani System of Medicine are presently being monitored by the Central Council of Indian Medicine which is a statutory body set up by an Act of Parliament known as Indian Medicine Central Council Act, 1970. At present there are about 31 recognised colleges of Unani Medicine in the country which provide education and training facilities in the Unani System of Medicine.

Postgraduate education and research facilities are also available at A.K.Tibbia College, A.M.U. Aligarh, Government Nizamia Tibbia College, Hyderabad and Hamdard Tibbia College, New Delhi. In accordance with its decision in 1975, Government of India has set up a separate National Institute of Unani Medicine at Bangalore in collaboration with the State Government of Karnataka. This Institute can also undertake the Research and Development, training and teaching in the specialities of the Unani System of Medicine.

RESEARCH IN UNANI MEDICINE

Systematic Research in various Indian Systems of Medicine including Unani Medicine under the patronage of Government of India started in 1969 with the establishment of Central Council for Research in Indian Medicine and Homoeopathy (CCRIM & H). In the year 1978, CCRIM & H was split into four separate Councils one each for Ayurveda & Siddha, Unani Medicine, Homoeopathy, Yoga and Naturopathy. The Central Council for Research in Unani Medicine (CCRUM), an autonomous organisation under the Ministry of Health and Family Welfare, Government of India engaged in developing independent and multi-dimensional research into various fundamental and applied aspects of Unani System of Medicine. The CCRUM gained name and fame for the successful treatment in Leucoderma during its thirty years of research.

A.3 : SIDDHA SYSTEM OF MEDICINE

Siddha is one of the ancient medical systems of the World. It was founded by Siddhars(Saints) who were highly talented Scientists and who perfectly understood the human mind and body during health and illness from embryonic life to death. The founders, who were known as Siddhars, lived in various parts of India, in general and Southern India in particular, specifically around Tamil Nadu. This system of Medicine developed within the Dravidian Culture which is of the pre-vedic period, The Siddha System is largely therapeutic in nature.

The medical literatures of Siddha which are mostly in the form of cudjan leaves in Tamil language and scientifically and systematically codified into various subjects starting from embriyology paediatrics to Geriatrics including the intermediary subjects like Ophthalmology, Gynaecology etc. This is the only system which deals leprosy under separate topic. This system also deals with the concept of salvation in life. The exponents of this system consider achievement of this state is possible by medicines and meditation.

PRESENT STATUS OF SIDDHA

Government of India has set up a Pharmaccpoeia Committee for Siddha System of Medicine for preparing official Formularies/Pharmacopoeias with a view to prescribe working standard for preparation of drugs and to prescribe working standard for compound formulations including test for identifying purity and quality of the drugs. Central Council of Indian Medicine, constituted under IMCC Act, 1970, regulates the education of Siddha System and Central Council for Research in Ayurveda and Siddha was established in 1978 with a view to initiate, undertake and regulate the research work in Siddha System of Medicine also.

The Government of India, as a policy matter, decided to establish National Institute for all the systems of Medicine. Accordingly the Government of India decided to establish National Institute of Siddha at Chennai. The Tamil Nadu Government transferred 14.5 acres of land at Chennai for National Institute of Siddha and the foundation stone was laid during March 1999. This institute will be established in this 9th Five Year Plan.

A.4: HOMOEOPATHY

DEFINITION

"Homoeopathy is a system of treatment of diseases by drugs usually prescribed in minute doses, that in a healthy person would produce symptoms like those of disease".

ORIGIN

The Homoeopathic way of healing was devised by the great German physician Dr.Christian Frederick Samuel Hahnemann in late 18th century. He came across an old idea of the efficacy of 'Cinchona bark' in treating intermittent fever due to its tonic effect on the stomach and conducted experiments upon himself in order to get the truth. He deduced from the experiment that Cinchona was used as a remedy for intermittent fever and it could produce symptoms similar to those of intermittent fever in healthy people, if taken for a period of time.

The law of 'Similia Similibus Curentur' or 'let likes be treated by likes' thus forms the basis of treatment under the Homoeopathic method of drug therapy employed to cure the natural sufferings of person by the administration of drugs which have been experimentally proved to possess power of producing similar artificial suffering or symptoms of diseases in healthy human being.

BASIC CONCEPTS

In Homoeopathy the main emphasis is on the remedial agents in illness and in health. It is a low cost system using only non-toxic drugs. It has established a reputation for successful treatment of chronic illness and in certain disease for which there is no or less treatment in other systems. Doctor Samuel Hanemann, who is the founder of this system enunciated the basic concepts and its principles in "Organ on the Art of Healing" in the year 1810.

Due to various reasons like cost-effectiveness and non-toxic nature of its drugs, Homoeopathy is getting a very high recognition and acceptance from the people in India. Having its origin in the modern scientific age it has the benefit of basing its theory and concept on demonstrable scientific principles and procedures.

It is based on four cardinal principles:

1. The law of Similars.
2. The law of Direction of Cure.
3. The Law of Single Remedy.
4. The law of Minimum Dose.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Among this the most fundamental is the 'law of Similars'. This law states that the symptoms experienced by the sick person are reactions of the defence mechanisms of the body which it mobilises in order to counteract a morbific influence, be it a specific stress such as bacteria or viruses, or a non-specific stress such as climatic changes, environmental pollution, mental and emotional disturbances etc. Symptoms are the best possible reaction of the organism under stress. They are the means through which the organism tries to regain its lost balance. In order to help the organism to achieve this, Homoeopathic physician should assist and strengthen these reactions through his drugs rather than suppressing the symptoms.

The other three laws further define the above central concept by describing the different phases likely to be experienced in the process of treatment, selection of only one single agent most potent to create the same response in healthy individuals as are being experienced by the sick person and determining the minimum possible dose to be given.

HEALTH AND DISEASE IN HOMOEOPATHY

This system assumes that any disease symptoms syndrome is the reaction of the defence mechanism of human body against disease causing agent. The symptoms are the means through which the body tries to regain its lost balance. According to it, the symptoms syndrome in a disease is not the disease per se but the reaction of the defence mechanism mobilised by the body in order to counteract a morbific influence existing in the body and causing the loss of balance of the healthy body. Thus the disequilibrium in the normal functioning of the organs of body implies sickness.

DIAGNOSIS AND TREATMENT

The classical approach to the problem is to individualise each patient although they may be suffering from the same disease. The practitioner has to have detailed and long interviews to find out specific characteristics of the defence mechanism of each sick person. He has to study the patient's mental, physical and emotional conditions. Such an examination alone gives an understanding of the imbalance and associated complex symptoms of the sick person.

TREATMENT IN HOMOEOPATHY

In Homoeopathy the primary emphasis is on therapeutics. It takes a holistic approach towards the sick individual and treats his disturbances on the physical, emotional and mental levels at the same time. Its aim is to bring back the lost equilibrium of the sick individual on all three levels by stimulating and strengthening his body's defence mechanism. The remedy for treatment is chosen on the assumption that the patient is extremely sensitive to it and that this remedy can produce the symptomatology of the sick person. In other words for treatment it believes that let the

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

same substance which can produce specific symptoms in a healthy individual cure those same symptoms in a sick individual. The prescribed remedy strengthens the body's defence mechanism which in turn re-establishes order or balance again.

In deciding the treatment the Homoeopathic practitioner follows the well known principles of 'Similia Similibus Curentur'. In simple terms it means let the same substance which can produce specific symptoms in a healthy individual cure those same symptoms in a sick individual. Although the symptoms has arisen from another cause i.e. Bacteria, Virus etc.. The cure is based on the assumption that the patient is extremely sensitive to that particular remedy and only to that remedy which can produce his symptomatology. Similarly, Homoeopathy, has definite effective treatment for such diseases as Diabetes, Arthiritis, Bronchial Asthma, Epilepsy, Skin Eruption, Allergic conditions and Mental or Emotional disorders.

The sick person after taking treatment not only gets cured of the disease, but simultaneously regains a perfect state of health.

ADVENT OF HOMOEOPATHY IN INDIA

Homoeopathic system of treatment was first introduced in India in 1839 by Dr. J.M.Honigberger. During his visit to India he cured Maharaja Ranjit Singh of Punjab though the native physicians failed to do that.. The Homoeopathic system of treatment spread successfully not only among the poor people but also among the civil and military personnel throughout the country. This system of treatment is economical and the medicines have got no side effects. So the people wanted the official recognition of Homoeopathy and such a resolution was passed by the Constituent Assembly in 1948 and later on by the Parliament. A number of Commissions, Committees and Associations were formed in order to popularise it throughout the country. The Central Government as well as State Governments started taking more initiative to introduce it in fuller sense. As a result, a number of dispensaries were opened throughout the country to provide Homoeopathic treatment for various diseases. Very few of doctors were institutionally trained and qualified. People became concerned about how proper Homoeopathic education can be imparted, how the quality of Homoeopathic drugs could be improved and how the knowledge could be reoriented and updated. Therefore, the Government constituted Homoeopathic Pharmacopoeia Committee in 1962 with a view to maintain uniform standards in preparation of drugs and to prescribe working standards for identifying purity and quality of drugs. Similarly Homoeopathy Central Council Act, 1973 was enacted in 1973 and Central Council of Homoeopathy was established in 1974 with a view to maintain and regulate uniform standards of education, maintenance of Central Register of Homoeopathy etc. A Homoeopathic Pharmacopoeia Laboratory was established at Ghaziabad (U.P.) in 1975 to maintain and prescribe standard of drugs. For conducting systematic and scientific research, the Central Council for Research in Homoeopathy was established in 1978. To set up a model Institute in the field of Homoeopathic Education, the National

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Institute of Homoeopathy was established at Calcutta (West Bengal) in 1975. Homoeopathic dispensaries were introduced in CGHS in 1967.

EDUCATION IN HOMOEOPATHY

The Education & Training facilities in Homoeopathy are presently being regulated by the Central Council of Homoeopathy. At present there are about 118 recognised Under -graduate Colleges of Homoeopathy in the Country. There are about 10 Institutions having upraded departments for Post-graduate training. Three specialities are already available for Post-graduation and another four more are on the avail.

RESEARCH IN HOMOEOPATHY

Systematic Research in Homoeopathy under the patronage of Govt. of India started in 1969 with the establishment of Central Council for Research in Indian Medicine and Homoeopathy. In the year 1978 CCRIMH was split into FOUR separate Councils one each for Ayurveda & Siddha, Unani Medicine, Yoga & Naturopathy and Homoeopathy. The Central Council for Research in Homoeopathy (CCRH), an Autonomous Organisation under Ministry of Health & Family Welfare,Govt. of India is engaged in developing independent and multi-dimensional Research on various fundamental and applied aspects of Homoeopathy.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

A.5: NATUROPATHY AND YOGA

NATUROPATHY

Naturopathy is not mainly the system of the treatment but a way of life. It is often referred to as drugless treatment of diseases. It is based mainly on the ancient practice of the application of the simple laws of nature. The system is closely allied to Ayurveda so far as fundamental principles are concerned. There are two schools of thought regarding the approach of Naturopathy. One group believes in the ancient Indian methods while the other mainly adopts western methods which are more akin to modern physiotherapy.

The advocate of Naturopathy pay particular attention to eating and living habits, adoption of purificatory measures, use of hydrotherapy, cold packs, mud packs, baths, massage and a variety of methods/ measures based on their innovative talent.

A carefully supervised total fast or partial fast is advocated to clear the system of toxic build up. Water and/ or dilute fruit juices are permitted. The Naturopathy has to keep a strict supervision lest the patient may develop physical and emotional untoward effects. The system believes that the way of life, if properly organised and if one does not retaliate, one can get the bounties of energy, health and happiness from the benevolent nature. What one is to do for prevention of diseases, promotion of health and to get therapeutic advantages is to adopt means natural to nature with no heroic measures of treatment or retaliation or distortion of nature.

YOGA

The system of Yoga is also as old as Ayurveda. It was about 2500 years when Patanjali propounded it in a systematic form, which consists of eight components namely restraint, observance of austerity, physical postures, breathing exercise, restraining of sense organs, contemplation, meditation and samadhi. These steps in the practice of Yoga have potential in improvement of social behavior, improvement of physical health, improvement of better circulation of oxygenated blood in body, restraining the sense organs and thereby the mind and in inducing tranquility and serenity in the mind.

The practice of integrated type of Yoga prevents Psychosomatic disorders/diseases and improves individual's resistance and ability to endure stressful situations. Meditation, one of the eight components mentioned earlier, if regularly practiced to a bare minimum, the mind can be directed to perform more fruitful functions.

A number of physical postures are described in yogic works to improve bodily health, to prevent disease and to cure illnesses. The physical postures are to be

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

chosen judiciously and are to be practised in a right way to derive the benefits of prevention of diseases, promotion of health and for therapeutic purposes. Breathing exercise helps in supply of proper oxygenated blood in the body.

Studies have revealed that the Yogic practices improve the intelligence and memory and help in developing resistance to endure situations of strain and stress and also to develop an integrated psychosomatic personality, meditation is yet another exercise which can stabilize emotional changes and prevent abnormal functions of vital organs of the body. Studies have shown that meditation not only restrains the sense organs but also controls the autonomic nervous system.

PRESENT STATUS OF NATUROPATHY AND YOGA

The National Health Policy recognizes the role of Naturopathy and Yoga for promotion of health and prevention of diseases. Central Council for Research in Yoga and Naturopathy was established in 1978 with a view to initiate, aid, develop and co-ordinate scientific research in different aspects of Yoga and Naturopathy and to promote and assist institutions of research for the study of diseases, their prevention, causation and remedy in the field of Yoga and Naturopathy. The Central Research Institute for Yoga was established during 1976 which has been merged in Morarji Desai National Institute of Yoga. Morarji Desai National Indstitute of Yoga has also started one year diploma course in Yoga since 1998-99. The Institute is also having 50 bedded Hospitals for providing treament to IPD patients and also with a view to conduct research for the study of diseases. The National Institute of Naturopathy, Pune has been registered as an autonomous body during 1984 under the Ministry of Health and Family Welfare.

A.6: AMCHI SYSTEM OF MEDICINE

The Amchi System of Medicine is also known as the Tibetan system of medicine and is in vogue in Ladakh district (J&K), Lahaul (Himachal Pradesh). Arunachal Pradesh, Sikkim and some regions of Himalayas. The system traces its origin to Ayurvedic system of India. The medical system since its delivery by Lord Buddhas, while meditating near Bodh -Gaya, in course of time, had accumulated a huge literature and Amchis of great fame and repute were produced. Therapy under the system is divided into treatment by herbs, minerals, animal organs, spring and mineral water, moxibustion and by mysticism and spiritual power.

The Tibetan system is patronized by His Highness the Dalai Lama. Tibetan Medical Institute of Dharmashala, Himachal Pradesh, was established by H.H. Dalai Lama in 1961 with a pharmacy, Tibetan Medical College, 10 bedded hospital, museum of drugs, surgical instruments ,texts and medical and astrological paintings besides Wings for Literary Research, Astrology and Astronomy. There are 14 dispensaries in India.

The Central Council for Research in Ayurveda and Siddha under the Ministry of Health and Family Welfare, is having an Amchi Research Unit to carry out clinical research and to conduct survey of local drug potential.

A.7: DEVELOPMENT AND CULTIVATION OF MEDICINAL PLANTS USED IN INDIAN SYSTEMS OF MEDICINE AND HOMOEOPATHY

The Indian Systems of Medicine, viz. Ayurveda, Unani, Siddha and also the Homoeopathic system predominantly use plant based raw materials in most of their preparations and formulations. The credibility of these systems, thus mainly depends upon the use of genuine raw materials in the manufacture of drugs of these systems. In all, about 2000 medicinal plants are estimated to find regular use in the Indian System of Medicine. Of these, 500 medicinal plants are most commonly used in preparation of Indian Systems of Medicine and Homoeopathy drugs.

There is an ever growing demand of medicines of Indian Systems of Medicine and Homoeopathy both for internal consumption and export purposes,. This has resulted in a spurt in the number of pharmacies in these systems which are now about 5000 scattered throughout the country. The sudden increase in demand of the pharmaceutical industry of Indian Systems of Medicine and Homoeopathy drugs has created a problem of supply and availability of sufficient quantities of medicinal plants for manufacture of genuine drugs.

In order to meet the above situation, measures are needed to promote the cultivation of medicinal plants. There is also need to create greater awareness amongst the population as a whole particulary amongst the farmers about the medicinal and economic value of these plants so that this heritage may be wisely used and exploited and at the same time conserved and perpetuated through judicious management for future generations.

Keeping in view the importance of development of medicinal plants the Department of ISM&H has formulated and implemented the following schemes:-

a) Central Scheme for Development and Cultivation of Medicinal Plants

The objective of the scheme is to augment the production of crude drugs of plant origin which are in greater demand and mainly used in preparation of drugs of ISM & H medicines. Central assistance is provided to the organisations under Central / State/UT Governments, autonomous bodies and Statutory organisations etc. for establishment of herbal gardens for cultivation of scarce and identified medicinal plants/trees required by the drugs industry of ISM&H which are in greater demand but are in short supply. It will also augment the efforts of growing these medicinal plants which are at present imported but have potential for cultivation indigenously. These herbal farms would also serve as demonstration centres to motivate other private farmers for taking up cultivation of such medicinal plants and also to create a general awareness amongst the people about their therapeutic value and importance for conservation and propagation.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Govt./Semi Govt. organisations engaged in the field of medicinal plants in States/UTs such as Government pharmacies and colleges of ISM&H, Public sector undertakings, Registered autonomous bodies, statutory organisations (directly controlled by Government) like research councils/ agriculture /Ayurveda/ medical Universities, research institutions under Central/State/UT Governments are eligible for Central assistance. The eligible institutions that have the basic infrastructure i.e. minimum 5 acres of cultivable land, technical know-how and preferably some experience in cultivation of medicinal plants and who are prepared to meet the entire recurring expenditure themselves are being provided financial assistance to meet the non-recurring expenditure on selected items for cultivation of identified medicinal plants/trees.

b) Central Scheme for Development of Agro-Techniques and Cultivation of Medicinal Plants used in Ayurveda, Siddha, Unani and Homoeopathy

The medicinal plants have been traditionally obtained from forests and no systematic effort was made in past for developing the package of practices for cultivation of these plants. It is not known for a large number of plants that what is the best way of propagating plants and what is the best season for raising a new plantation. The package of such practices has been worked out for some medicinal and aromatic crops, but for most of the plants the required agro-techniques are not known or standardized. Developing and standardizing such package of practices is obviously essential for taking up work of cultivation of these plants at commercial level.

In view of the above, the Department of Indian Systems of Medicine & Homoeopathy have implemented this scheme w.e.f. year 1997-98. Under this scheme Central assistance is provided to specialized institutions (Govt./Semi-govt.) on project basis for development of agro-techniques of identified medicinal plants. The Department sanctioned total 26 projects in the year 1997-98 which are suppose to run for first year of projects and about 94 species of medicinal plants which are considered to be endangered and specifically important for ISM&H medicines shall be studied for development of their agro-techniques. New projects were also sanctioned to 8 more organisations during the year 1998-99 to cover 32 more medicinal plants for development of agro-techniques. This way, the Department is implementing total 32 projects in different organisations to develop agro-techniques for about 126 medicinal plants.

In addition to the activities undertaken by the Department itself, the Department has also been pursuing other concerned Departments for inclusion of programmes on development of medicinal plants which are specifically used in ISM Medicines. The Departments like Bio-Technology, Science and Technology, Agriculture and Environment & Forests have also been implementing programmes which cover medicinal plants also.

TIBETAN SYSTEM :

Tibetan system of Medicine is patronised by H.H. the Dalai Lama. The infrastructure for this system is given below. They are all in Non-government sector and at present are not aided by this Ministry.

MEN-TSEE-KHANG

(Tibetan Medical & Astrological Institute of H.H. the Dalai Lama)

MEN-TSEE-KHANG (Tibetan Medical & Astrological Institute) is a cultural, educational and charitable Institution that functions under the guidance and support of His Holiness the Dalai Lama. Re-established in 1961 as the Tibetan Medical Institute, and renamed Men-Tsee-Khang on 19 September, 1995. The Institute's primary objective was to preserve and practise the ancient system of Tibetan Medicine.

Today, the Medical and Astrological College prepares new doctors to work in MEN-TSEE-KHANG'S numerous clinics in India and Nepal. Each year the clinics provide more and more health care to thousands of Tibetans, Indians and foreign pateints regardless of caste, colour or creed. Free or concessional health care is given to the poor and needy, monks and nuns and to all new arrivals from Tibet. Even though the cost to produce traditional Tibetan Medicine is quite high, the cost to patients is kept very low to assure its accessibility to all patients who need it.

MEN-TSEE-KHANG derives some income from the products it produces, however, it depends greatly on the generosity of individuals and Tibet support groups for most of its operating costs and to carry out its charitable programmes.

The main facility located in Dharamshala includes administrative and reseach offices, the Medical & Astrological College, hospital, pharmaceutical department, library, museum and housing facilities for the staff and students. In addition to the main facility there are nearly forty branch clinics through out India and Nepal and Men-Tsee- Khang Exports located in New Delhi.

The Medical and Astrological College

The College has been training students since 1961. Students studying traditioanl medicine attain a five year Kachupa degree,or Bachelor or Traditional Tibetan Medicine & Surgery while students studying astro. Sciences attain a five year Tsipa Kachupa Degree, or Bachelor of Traditional Tibetan Astronomy and Astrology. College admission is strictly on entrance test basis. However, few seats are allotted to new arrivals from Tibet, monks & nuns and to the students from the Himalayan region. Since all classes are taught in Tibetan, fluency in Tibetan is a prerequisite. Most students are sponsored by individuals or Tibet support groups, as well as by the Tibetan Government.

Hospital and Out Patient Clinic

A ten bed hospital located in the Dharamshala complex provides medical treatment as well as room and board to poor and needy patients free of charge. The Institute operates nearly forty out patient clinics throughout India and Nepal with resident doctors who are mostly

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

graduates of the Tibetan Medical and Astrological College. More than 6,00,000 patients were treated at these clinics in 1995-96

Pharmaceutical Department

The Pharmaceutical Department is responsible for the production of about 160 medicines in various forms, such as decoctions, powders, pills, medicinal beverages, butter tonics and medicinal pastes as well as precious compounds. Medications are then sent to branch clinics in India and Nepal and to patients in different parts of the World.

Astrological Department

Using computers and traditional methods of calculaltions, the Astrological Department produces a yearly almanac and calendar and prepares horoscopes for individual clients in India and abroad. Astrologers are also consulted for marriage horoscopes, State functions and for medical purposes.

Research and Development Department

The Research and Development Department conducts clinical research, performs research documentation and produces new non-medicinal products.

Materia Medica Department

The Materia Medica Department handles the research and documentation of the ingredients used in Tibetan medicine, including the cultivation of plants. Medical students, accompanied by expert physicians and college lecturers, travel to the mountains of Himachal Pradesh, each year to learn medicinal plant identification as well as assist with the collection of specimens for later study.

Documentation and Publication Department

A quarterly newsletter, journals in Tibetan and English on traditional Tibetan medicine and astrology are published by the documentation and Publication Department. The journal sMan-rTsis, features lectures and articles by our senior physicians and astrologers as well as updates on the latest research. All important activities and many of the College lectures are recorded via audio and video tapes and available to researchers and staff.

The Museum

The museum, which is open to the public, displays the ingredients used to manufacture Tibetan medicine, ancient surgical tools, medical and astrological charts, thankas, icons and other items of cultural interest.

ANNEXURE -II

STATE-WISE RESEARCH UNITS/CENTRES UNDER VARIOUS RESEARCH COUNCILS

ANDHRA PRADESH

RESEARCH INSTITUTES / UNITS UNDER CCRAS

1. Regional Research Centre (Ay.), 'A' Block, Ist Floor, North wing, Indira Gandhi Stadium Complex, Bangar Road, Vijayawada-5200 10. (Having 10 bedded Research Hospital also)
2. Indian Institute of History of Medicine, Osmania Medical College Building, Putlibowli, Hyderabad-500001.
3. Clinical Research Unit(Ayurveda), Dr. BRKR Govt. Ayurvedic College, Erragade, Hyderabad-500038.
4. Chemical Research Unit, Department of Chemistry, University College of Sciences, Osmania University, Hyderabad-500067.

RESEARCH INSTITUTES / UNITS UNDER CCRUM

1. Central Research Institute of Unani Medicine, Opp. ESI Hospital, A.G. Colony, Ist Hospital, Erragada, Hyderabad-500898. (Having 100 bedded Research Hospital but actually 50 beds are in position)
2. Clinical Research Unit, 40-23, Park Road Kurnool – 518001. (Having 10 bedded Research Hospital)
3. Family Welfare Research Unit, Government Nizamia Tibbia College, Charminar, Hyderabad-500002.

RESEARCH INSTITUTES / UNITS UNDER CCRH

1. Regional Research Institute (Homoeo.), 13/210-A, Club Road, Gudivada-521301. Having 10 bedded Research Hospital also)
2. Drug Standardisation Unit (Homoeo.), O.U.B. 32, Room No. 4, Vikram Puri, Habsigunda, Hyderabad-500 007.
3. Clinical Research Unit (Homoeopathy), Door No. 6-1- 61-A, K.T. Road, Tirupathi.
4. Clinical Research Unit (T) for Homoeopathy, Door No. 74-19-3, Enemalakuduru Road(Lock Road), Patamata-Krishna Nagar, Krishna Distt., Vijayawada-520 007

YOGA AND NATUROPATHY INSTITUTIONS RECEIVING GRANT-IN-AID THROUGH C.C.R.Y.N.

1. Gandhi Nature Cure College, Begumpet, Hyderabad.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ANNEXURE - II Contd.

ARUNACHAL PRADESH

RESEARCH INSTITUTES/UNITS UNDER CCRAS

1. Tribal health Care Research Project, Ziro – 791120.
2. Regional Research Centre (Ay.) , New Itanagar-791111. (Having 10 beded Hospital also)

RESEARCH INSTITUTES/UNITS UNDER CCRUM

NIL

RESEARCH INSTITUTES/UNITS UNDER CCRH

1. Clinical Research Unit (T) for Homoeopathy
   Qr. No.39, Type III, Vivek Vihar, P.O. R.K. Mission, Distt. Papumpur, Itanagar, Aurnachal Pradesh.

YOGA & NATUROPATHY INSTITUTIONS RECEIVING GRANT-IN-AID THROUGH CCRYN

NIL

ASSAM

RESEARCH INSTITUTES/UNITS UNDER CCRAS

1. Regional Research Centre (Ay.), Govt. Ayurveda College, Jalukbari, Guwahati-781014.

RESEARCH INSTITUTES/UNITS UNDER CCRUM

1. Clinical Research Unit, Civil Hospital, Karim Ganj.

RESEARCH INSTITUTES/UNITS UNDER CCRH

1. Clinical Research Unit (H), 12, Kharlipara 2, Odal Bakara, Guwahati-781 019
2. Clinical Research Unit (T) for Homoeopathy, Hukum Singh Bldg., Forest Colony, P.O.Diphu District Karbianglong-782 460.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

YOGA AND NATUROPATHY INSTITUTIONS RECEIVING GRANT-IN-AID THROUGH CCRYN

1. Shivananda Math and Yogashram Sangh, Umachal Yogashram, Kamakhya, Guwahati-10.

BIHAR

RESEARCH INSTITUTES/UNITS UNDER CCRAS

1. Regional Research Institute (Ay.), D- Block, Rajindera Memorial Research Institute Building, Agam Kuan , Patna-800007.
   (Having 25 bedded Research Hospital also)
2. Tribal Health Care Research Project, Mata Dropadi Devi, Namdhari, Jamini, P.O. Rajwadih, Ist Palamu.

RESEARCH INSTITUTES/UNITS UNDER CCRUM

1. Regional Research Institute of Unani Medicine, Shahi House, East Boring Canal Rd., Patna-800001. (having 25 bedded hospital also).

RESEARCH INSTITUTES/UNITS UNDER CCRH

1. Clinical Verification Unit (H), NC-152, Gayatri Mandir Marg, Kankar Bagh, Patna-800020.
2. Clinical Research Unit (T) for Homoeopathy, Millat Colony, Kanke, Ranchi –834006.

YOGA AND NATUROPATHY INSTITUTIONS RECEIVING GRANT-IN-AID THROUGH CCRYN

1. Bihar School of Yoga, Munger.

DELHI

RESEARCH INSTITUTES/UNITS UNDER CCRAS

(i) AYURVEDA

1 Central Research Institute(Ay.), Road No.66, Punjabi Bagh , New Delhi.
(Having 50 Beded Research Hospital also)

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

ANNEXURE - II Contd.

2. Documentation & Publication Division, Jawahar Lal Nehru Bharatiya Chikitsa Padhati Avum Homoeopathy Anusandhan Bhavan, Opp." D" Block, Janakpuri, New Delhi-110058.
3. Central Museum & Herbarium at Central Research Institute(Ay.), Road No.66, Punjabi Bagh, New Delhi.
4. Pharmacological Research Unit, C/o Maulana Azad Medical College, New Delhi.

(ii) SIDDHA

1. Clinical Research Unit (S), Safdarjung Hospital, New Delhi.

RESEARCH INSTITUTES/UNITS UNDER CCRUM

1. Drug Standardisation Research Unit , Jamia Hamdard, Hamdard Nagar-110062.
2. Literary Research Institute , IHMMR, Hamdard Nagar-110062.
3. Regional Research Instt. of Unani Medicine, D – 11/1, Abul Fazal Enclave, Jamia Nagar, Okhla, New Delhi –110025.

RESEARCH INSTITUTES/UNITS UNDER CCRH

1. Regional Research Institute (H) at Nehru Homoeopathic Medical College & Hospital, B-Block, Defence Colony-110024.
2. Homoeopathic treatment Centre, CGHS Wing, Safdarjung Hospital, New Delhi.

YOGA & NATUROPATHY INSTITUTIONS RECEIVING GRANT-IN-AID THROUGH C.C.R.Y.N.

NIL

GUJARAT

RESEARCH INSTITUTES/UNITS UNDER CCRAS

1. Regional Research Institute(Ay.), Taj Manzil, Sardar Bagh, Junagadh-362001, (having 25 bedded hospital also)
2. Mobile Clinical Research Unit , Gulabkunverba Ayurvedic College, Gujarat Ayurvedic University, Jamnagar-361008.
